

# SLURRY DISCHARGE SYSTEMS

- Easy and effective way to remove slurry from the stable
- Practically no loss of pit capacity caused by slurry deposits
- Improved house climate
- Necessary in combination with a biogas installation

## Discharge systems with main valve

### Available with

- Slide gate valve
- Non-lockable valve
- Lockable valve

### Lockable main valve

- Custom made (pipes, T-pieces and valves)
- Sealed by sanding, rubber ring, swelling glue or a combination

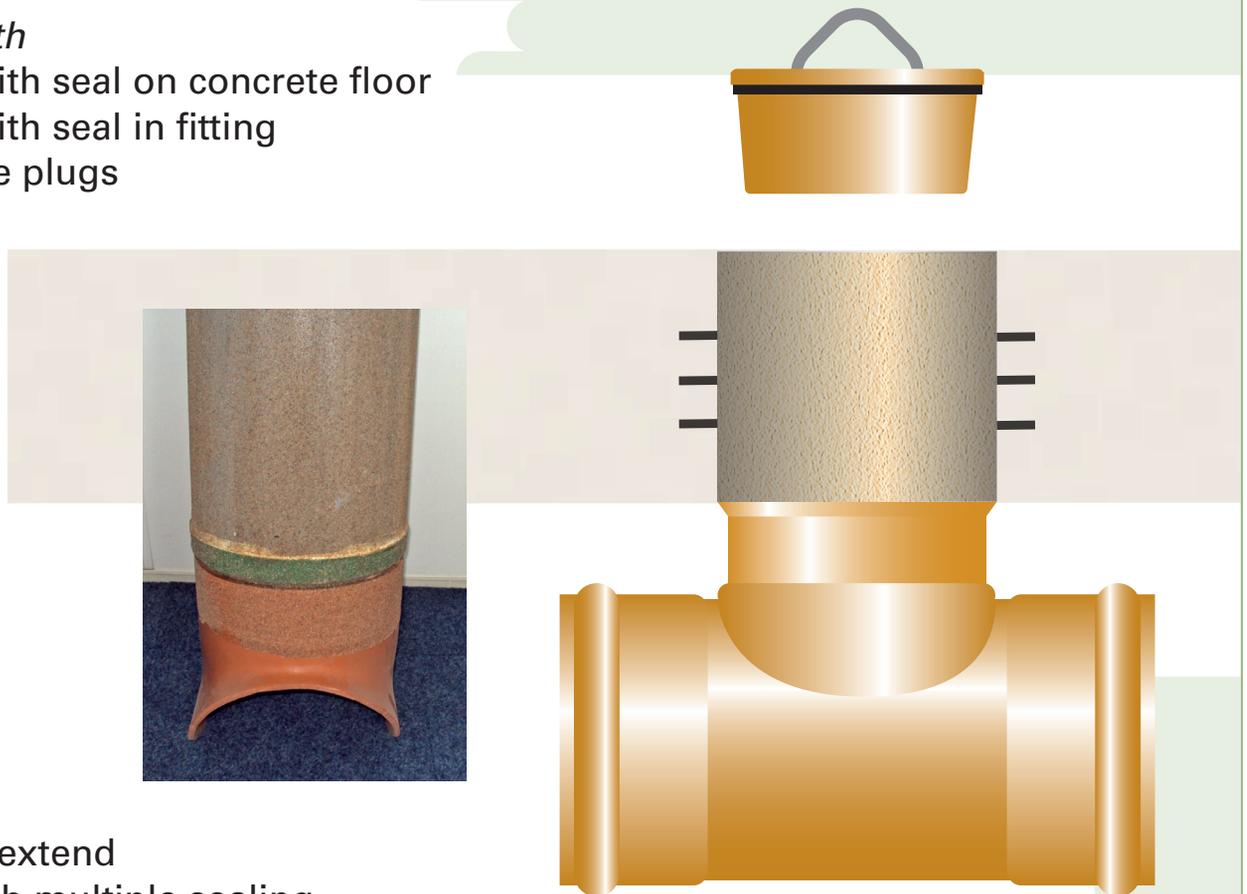

If required we can also install your discharge system. Our installation team has a trench digger (with slope sensor) and a fully automatic laser controlled leveller.

## Discharge systems with plug in the inlet opening

Available with

- > Plugs with seal on concrete floor
- > Plugs with seal in fitting
- > Lockable plugs

- > Easy to extend
- > Plug with multiple sealing

## Discharge systems with discharge to adjacent cellar

Available as

- > Built-on system
- > Built-in system

Both systems are available with the control panel installed in the animal section or in the central corridor.
